

MINUTES OF THE BOARD OF SUPERVISORS
COUNTY OF LOS ANGELES, STATE OF CALIFORNIA

Sachi A. Hamai, Executive Officer-
Clerk of the Board of Supervisors
383 Kenneth Hahn Hall of Administration
Los Angeles, California 90012

At its meeting held April 17, 2007, the Board took the following action:

9

The following item was called up for consideration:

Supervisor Burke's recommendation to instruct the Chief Administrative Officer's Intergovernmental Relations Branch to work with the Los Angeles County Legislative Delegation, as appropriate, to further the following legislative goals: 1) Support proposals to promote HIV/AIDS policy consistent with accepted public health standards; and 2) Support legislation that increases availability of and access to routine HIV screening, education, outreach, care and treatment, including in Federal, State, and local correctional facilities and incarceration settings.

Supervisor Burke made the following statement:

"While major efforts are being made to curb the rate of HIV/AIDS infection within our communities, new infections stubbornly persist and among the venues raising the most concern are our correctional facilities.

"In the United States, 17% of people living with HIV/AIDS have spent time in the United States correctional system, and among those with a history of incarceration the prevalence rate of AIDS is six times higher than in the general public. Incarcerated persons are characterized by disproportionate rates of poverty, injection drug use, high-risk sexual activity, and poor access to preventive and primary health care. Despite efforts by our public health and correctional systems to prevent these behaviors, we must acknowledge that a significant proportion of people entering correctional facilities will continue to engage in high-risk activities while incarcerated and subsequent to their release.

(Continued on Page 2)

9 (Continued)

“Of the 45,000 parolees and probationers who attempt to create new lives for themselves each year in Los Angeles County, a higher than average proportion will be HIV positive, knowingly or unknowingly. For those who do not know their HIV status, they may represent a serious public health threat for the community and for those people with whom they may have high-risk contact. For those who do know that they are HIV positive, it is imperative that they have access to a continuum of care to treat their illness and the skills and resources to prevent new HIV transmissions.”

Therefore, on motion of Supervisor Burke, seconded by Supervisor Knabe, was duly carried by the following vote: Ayes: Supervisors Molina, Burke, Knabe and Yaroslavsky; Noes: Supervisor Antonovich, the Chief Administrative Officer's Intergovernmental Relations Branch was instructed to work with the Los Angeles County Legislative Delegation, as appropriate, to further the following legislative goals:

1. Support proposals to promote HIV/AIDS policy consistent with accepted public health standards; and
2. Support legislation which provides funding for increased availability of and access to routine HIV screening, education, outreach, care and treatment, including in Federal, State, and local correctional facilities and incarceration settings.
